Rail Measurements

How to Determine Exact Rail Length

NOTE: The rail length will determine the seat height at the top of the stairs.

Measure length of stairway by placing a tape measure in a straight line on the stairs from the top step nose to the floor.

(A) Length of Stairway: _____

(B) For an Elan, add 12" for a 20" seat height.
 For an Elite, add 9" for a 20" seat height: + _____

[Add 1.5" for each 1" seat height is increased.]
